

Okechukwu Goodluck Ebubechukwu

Current Address: PraiseLand, Checkpoint, Badagry, Lagos State, Nigeria.

E-mail Address: ebubeokechukwu13@gmail.com

Phone Number: +234 814 415 2544

GitHub Account: <https://github.com/Okesh101>

Portfolio: <https://okesh101.github.io/My-Portfolio>

CAREER OBJECTIVE

Backend-focused Computer Science undergraduate with hands-on experience developing backend services using Python (Flask) and C++. Experienced in building REST APIs, authentication systems, and full-stack applications using React and backend frameworks. Passionate about designing scalable systems and solving real-world automation problems.

BACKEND DEVELOPMENT SKILLS

Backend Development: Python (Flask), REST API Design, Backend Architecture, Crow (C++)

Programming Languages: Python, C++, JavaScript

Databases: SQLite3, SQL

Frontend: React, HTML, CSS

Tools & Technologies: Git, Linux/Ubuntu, LangChain, OpenCV, Arduino

AI Development Tools: AI-assisted coding tools, LangChain workflows

Other: Problem Solving, System Design Thinking, Debugging

EDUCATION

Lagos State University, Ojo, Lagos State

B.Sc. in Computer Science — In View (Expected Graduation: 2027)

Federal Government College, Idoani, Ondo State (Finished August 2023)

WASSCE 2023

PROJECTS & TECHNICAL EXPERIENCE

Exam Portal Website

Developed a full-stack examination portal using React and a Crow (C++) backend. Implemented authentication, timed exams, question randomization, and dynamic exam rendering. Designed backend routing logic and structured API endpoints for secure communication between the frontend and backend.

Debate-AI

Built an AI-powered debate simulation platform using **Python Flask and React**. Designed backend REST APIs that manage debate sessions, coordinate AI responses using LangChain, and handle client-server communication.

Password Strength Checker

Developed a cybersecurity evaluation tool using C++, JavaScript, HTML, and CSS that analyzes password strength using breach lists and rule-based vulnerability checks.

Backend Developer (Contributor) – Job Search Platform

Contributing to backend development using Crow (C++), implementing routing logic and designing data structures for job listings and application workflows.

Face Authentication System (In Progress)

Developing a facial biometric authentication system using OpenCV for image processing and backend integration with Crow (C++) for secure identity verification.

Arduino Embedded Projects

Hands-on embedded programming with Arduino microcontrollers and sensor interfacing.

LEADERSHIP EXPERIENCE

Vice President & Evangelism Secretary – Anglican Students' Fellowship, LASU Ojo (2025)

- Coordinated campus fellowship activities.
- Organized programs and student outreach engagements.
- Strengthened participation and leadership culture.

Assistant Team Lead – First Lego League Robotics Club, FGC Idoani (2021–2023)

- Led robot-building tasks and design sessions.
- Contributed to strategic planning during competitions.

CERTIFICATIONS

- Sololearn - C# Intermediate (2026)
- Sololearn - Introduction to C# (2026)
- First Lego League – Superpowered (2023) – Participated and organized team activities to National level with emergence as top 4 at Zonal level.
- First Lego League – Cargo Connect (2022) – Participated and lead team to National level emerging as top 5 at Zonal level.
- Cisco Get Connected (2021)

INTERESTS

Machine Learning, Cybersecurity, Robotics, Software Development, Artificial Intelligence
