PROFESSIONAL SUMMARY

Backend Software Engineer and Computer Science undergraduate with hands-on experience building, deploying, and maintaining RESTful backend services using Python (Flask) and C++. Experienced with PostgreSQL, Redis, Docker, Flask-Migrate, Linux, and cloud deployment on Render using Neon PostgreSQL. Built secure authentication systems, AI-powered applications, and full-stack platforms while collaborating in hackathons, internship projects, and open-source development. Passionate about designing reliable backend systems that solve real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, Typescript, SQL

Backend: Flask, Crow (C++), REST APIs, JWT Authentication, Flask-Migrate

Databases: PostgreSQL, Redis, SQLite

Frontend: React, HTML, CSS

Cloud & DevOps: Docker, Render, Neon PostgreSQL, Vercel, Git, Linux (Ubuntu)

API Testing: Postman, EchoAPI

AI/Computer Vision: LangChain, OpenCV

PROFESSIONAL EXPERIENCE

Python Developer (Contract)

June 2026 - Present

Vitalvida

Remote

Tech Stack: Python, React, TypeScript, Frappe, REST APIs, Git, Linux (Ubuntu)

- Build and maintain React/TypeScript dashboards for two production portals (Sales Manager Portal, Telesales Rep Portal), wiring 9 sidebar sections to live Frappe backend endpoints.
- Troubleshoot and hotfix breaking issues across financial endpoints and webhooks, stabilizing payment and transaction workflows.
- Maintain codebase synchronization across development and production environments by generating and applying isolated Git patches.
- Couple React frontend components to existing REST APIs, resolving data-binding and currency-formatting inconsistencies (pre-formatted values rendered as-is, raw numeric fields passed through a shared formatter) across both portals.

IT Support Intern

March 2026 - Present

CMS Grammar School

Bariga, Lagos

- Troubleshoot hardware, software and network-related issues across the school's ICT infrastructure.
- Configure IP addressing and network settings for computers and institutional devices.
- Install, configure and maintain operating systems and software applications.
- Diagnose and resolve system failures to minimize downtime for staff and students.
- Provide technical support for users and assist with maintaining the school's IT environment.

SELECTED PROJECTS

Smart Staff Attendance & Verification System | *Flask, PostgreSQL, React*

Jun 2026 - Present

- Designed backend APIs for staff attendance management.
- Implemented QR-code based staff check-in with GPS location validation to prevent proxy attendance.

- Built secure attendance record management.
- Developed administrative endpoints for attendance reporting.

Lucidify (Legal-Tech) | *Flask, PostgreSQL, Docker*

Apr 2026 - May 2026

- Built backend services supporting automation of CAC annual return processing.
- Designed relational database structures for business records.
- Containerized the application using Docker to ensure consistent deployment environments.
- Collaborated on backend architecture and API design.

AI Debate Platform | *Flask, React, LangChain, OpenRouter*

May 2025 - Aug 2025

- Built an AI-powered debate platform integrating multiple AI models through LangChain workflows.
- Designed REST APIs for communication between the frontend and backend.
- Managed backend orchestration for AI-generated debate responses.

Online Examination Platform | *Crow (C++), React, SQLite*

Mar 2024 - Sep 2024

- Developed a secure examination management platform supporting students, teachers, and administrators.
- Implemented JWT-based authentication and role-based authorization.
- Built timed examinations with automatic submission when time expires.
- Implemented randomized question delivery and secure answer submission.
- Designed backend APIs for authentication, examination management, and results processing.

EDUCATION

Lagos State University

B.Sc in Computer Science (Expected Graduation: 2027)

Nov 2023 - Present

Ojo, Lagos, Nigeria
